

# Boot strap

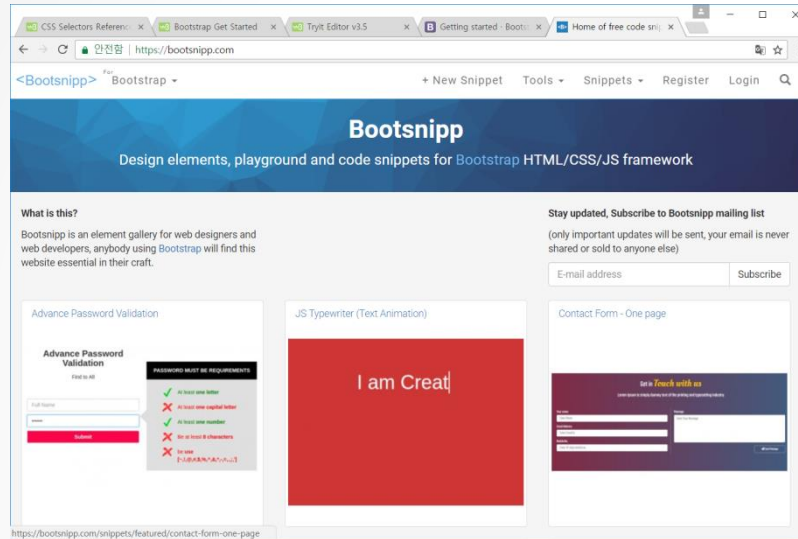

# Intro

# What is Bootstrap?

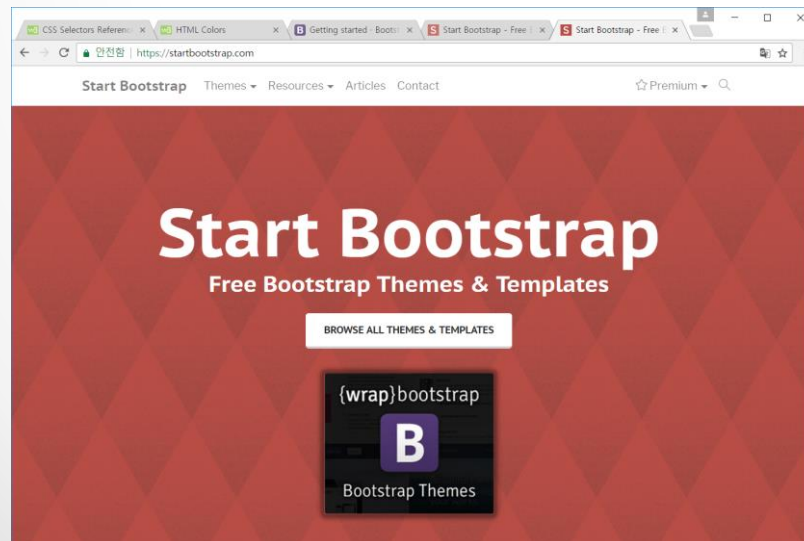

## Advantages of Bootstrap:

- ***Easy to use***: Anybody with just basic knowledge of HTML and CSS can start using Bootstrap
- ***Responsive features***: Bootstrap's responsive CSS adjusts to phones, tablets, and desktops
- ***Mobile-first approach***: mobile-first styles are part of the core framework
- ***Browser compatibility***: Bootstrap is compatible with all modern browsers (Chrome, Firefox, Internet Explorer, Safari, and Opera)

# Bootstrap Site

# Bootstrap Site

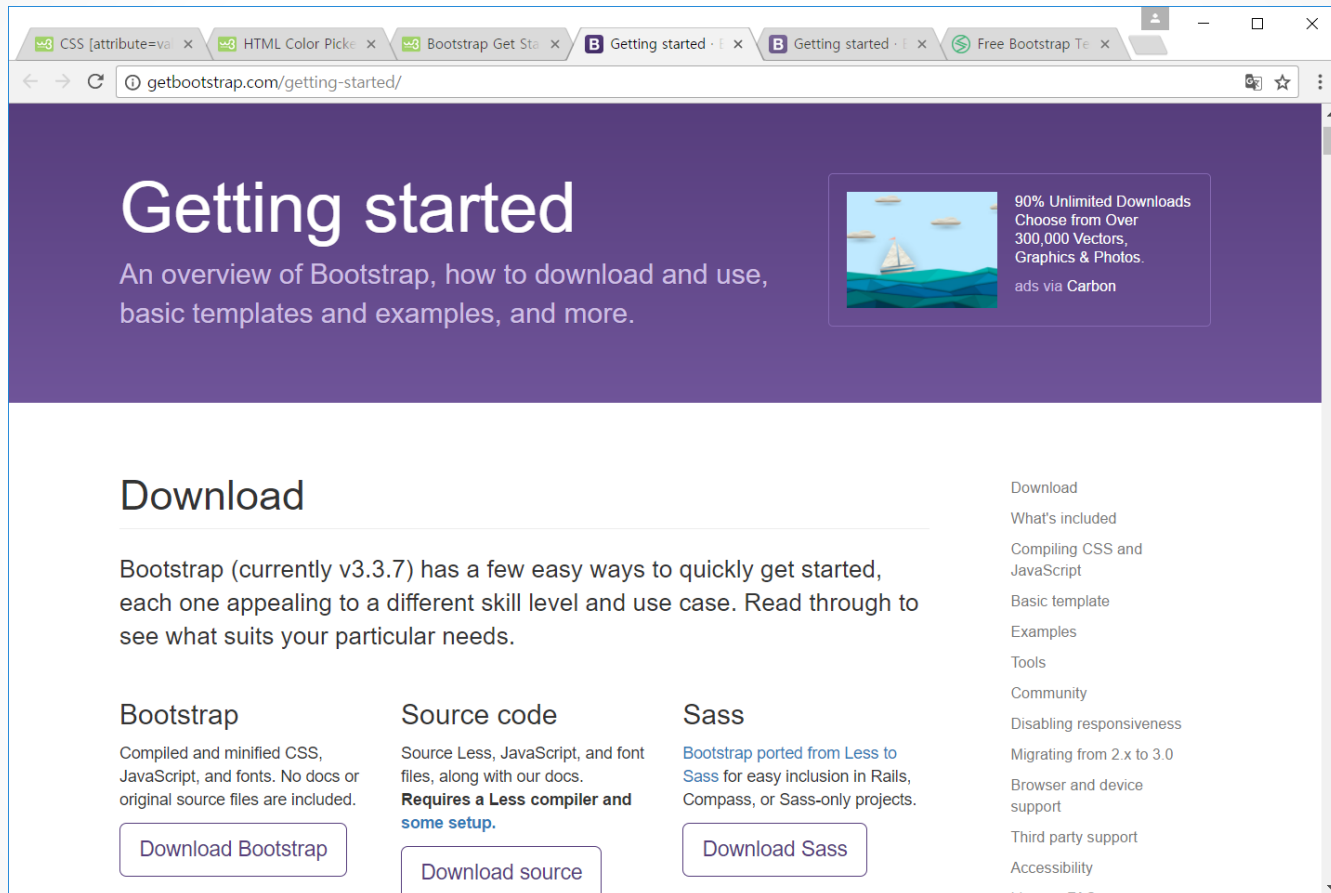

<https://shapebootstrap.net/free-templates>

# Bootstrap Install

- Download Bootstrap from [getbootstrap.com](https://getbootstrap.com)
- Include Bootstrap from a CDN

```
<link rel="stylesheet"
href="https://maxcdn.bootstrapcdn.com/bootstrap/3.3.7/css/bootstrap.min.
css">
<script
src="https://ajax.googleapis.com/ajax/libs/jquery/3.2.0/jquery.min.js"></scri
pt>
<script
src="https://maxcdn.bootstrapcdn.com/bootstrap/3.3.7/js/bootstrap.min.js"
></script>
```

# Bootstrap Download

The screenshot shows a web browser window with multiple tabs. The active tab is 'Getting started' on the URL 'getbootstrap.com/getting-started/'. The page has a purple header with the title 'Getting started' and a sub-header 'An overview of Bootstrap, how to download and use, basic templates and examples, and more.' To the right of the header is a small image of a sailboat and a text box that says '90% Unlimited Downloads Choose from Over 300,000 Vectors, Graphics & Photos. ads via Carbon'. Below the header, the page is divided into two main sections. The left section is titled 'Download' and contains a paragraph: 'Bootstrap (currently v3.3.7) has a few easy ways to quickly get started, each one appealing to a different skill level and use case. Read through to see what suits your particular needs.' Below this paragraph are three columns: 'Bootstrap' (with a 'Download Bootstrap' button), 'Source code' (with a 'Download source' button), and 'Sass' (with a 'Download Sass' button). The right section is a vertical list of links: 'Download', 'What's included', 'Compiling CSS and JavaScript', 'Basic template', 'Examples', 'Tools', 'Community', 'Disabling responsiveness', 'Migrating from 2.x to 3.0', 'Browser and device support', 'Third party support', 'Accessibility', and 'License FAQs'.

Getting started

An overview of Bootstrap, how to download and use, basic templates and examples, and more.

90% Unlimited Downloads  
Choose from Over  
300,000 Vectors,  
Graphics & Photos.  
ads via Carbon

## Download

Bootstrap (currently v3.3.7) has a few easy ways to quickly get started, each one appealing to a different skill level and use case. Read through to see what suits your particular needs.

**Bootstrap**  
Compiled and minified CSS, JavaScript, and fonts. No docs or original source files are included.

**Source code**  
Source Less, JavaScript, and font files, along with our docs. **Requires a Less compiler and some setup.**

**Sass**  
[Bootstrap ported from Less to Sass](#) for easy inclusion in Rails, Compass, or Sass-only projects.

# Bootstrap Grids

# Bootstrap Grid System

span 1	span 1	span 1	span 1	span 1	span 1	span 1	span 1	span 1	span 1	span 1	span 1
span 4				span 4				span 4			
span 4				span 8							
span 6						span 6					
span 12											

- Bootstrap's grid system allows up to 12 columns across the page
- Rows must be placed within a **.container** (fixed-width) or **.container-fluid** (full-width)
- The Bootstrap grid system has four classes :  
xs (for phones) / sm (for tablets) / md (for desktops) / lg (for larger desktops)
- Predefined classes like **.row** and **.col-sm-4** are available for quickly making grid layouts

# Grid Options

	Extra small devices Phones (<768px)	Small devices Tablets (≥768px)	Medium devices Desktops (≥992px)	Large devices Desktops (≥1200px)
Grid behaviour	Horizontal at all times	Collapsed to start, horizontal above breakpoints	Collapsed to start, horizontal above breakpoints	Collapsed to start, horizontal above breakpoints
Container width	None (auto)	750px	970px	1170px
Class prefix	.col-xs-	.col-sm-	.col-md-	.col-lg-
Number of columns	12	12	12	12
Column width	Auto	~62px	~81px	~97px
Gutter width	30px (15px on each side of a column)	30px (15px on each side of a column)	30px (15px on each side of a column)	30px (15px on each side of a column)
Nestable	Yes	Yes	Yes	Yes
Offsets	Yes	Yes	Yes	Yes
Column ordering	Yes	Yes	Yes	Yes

# Bootstrap Grid Code

```
<div class="row">
  <div class="col-xx-x"> ... <.../div>
  ...
</div>
<div class="row">
  <div class="col-xx-x"> ... <.../div>
  ...
</div>
```

## Col-xx-x

Xx : gridClass

- xs (for phones)
- sm (for tablets)
- md (for desktops)
- lg (for larger desktops)

X : gridNumber

- 1~12의 숫자를 입력하여 한 행의 gridNumber 합이 12가 넘으면 다음 행으로 줄바꿈 된다.

# Bootstrap Grid Code

```
<div class="row">  
  <div class="col-sm-3">col-sm-3</div>  
  <div class="col-sm-9">col-sm-9</div>  
</div>
```

```
<div class="row">  
  <div class="col-sm-3">col-sm-3</div>  
  <div class="col-sm-5">col-sm-5</div>

# Bootstrap Typography

# Default Settings

- Bootstrap's global default  
: font-size is 14px / line-height of 1.428.
- `<h1>` - `<h6>`  
: 36px / 30px / 24px / 18px / 14px / 12px
- `<small>`  
: lighter, secondary text in any heading:
- `<mark>` / `<abbr>` / `<code>` / `<kbd>`
- `<dl>` `<dt>` `<dd>` / `<pre>`
- `<blockquote>` / `<blockquote class= "blockquote-reverse">`
- Contextual Colors :  
.text-muted / .text-primary / .text-success / .text-info  
/ .text-warning, / .text-danger
- Backgrounds :  
.bg-primary / .bg-success / .bg-info / .bg-warning / .bg-danger:

# Typography Classes

Class	Description
.lead	Makes a paragraph stand out
.small	Indicates smaller text (set to 85% of the size of the parent)
.text-left	Indicates left-aligned text
.text-center	Indicates center-aligned text
.text-right	Indicates right-aligned text
.text-justify	Indicates justified text
.text-nowrap	Indicates no wrap text
.text-lowercase	Indicates lowercased text
.text-uppercase	Indicates uppercased text
.text-capitalize	Indicates capitalized text

# Typography Classes

Class	Description
.initialism	Displays the text inside an <abbr> element in a slightly smaller font size
.list-unstyled	Removes the default list-style and left margin on list items (works on both <ul> and <ol>).
.list-inline (ul/ol) .list-inline-item (li)	Places all list items on a single line
.dl-horizontal	Lines up the terms (<dt>) and descriptions (<dd>) in <dl>elements side-by-side. Starts off like default <dl>s, but when the browser window expands, it will line up side-by-side
.pre-scrollable	Makes a <pre> element scrollable

# Typography Code

## mark, abbr

The `mark` tag defines marked text. Use the `mark` tag if you want to highlight parts of your text.

The `abbr` tag defines an abbreviation or an acronym.

## code, kbd, var

Code Element : Indicates inline snippets of code: `span` , `div`

kbd Element : Indicates input that is typically entered via the keyboard: `CTRL + Z`

var Element : Indicates variables: `x = ab + y`

<p>The <mark>mark</mark> tag defines marked text. Use the <mark>mark</mark> tag if you want to highlight parts of your text.</p>

<p> The <abbr title="abbreviation title definition">abbr </abbr> tag defines an abbreviation or an acronym.</p>

<p> Code Element : Indicates inline snippets of code: <code>span </code>, <code>div</code> </p>

<p> kbd Element : Indicates input that is typically entered via the keyboard: <kbd>CTRL</kbd> + <kbd>Z</kbd> </p>

<p> var Element : Indicates variables: <var>x = ab + y</var> </p>

# Typography Code

The blockquote tag is a semantic tag that tells the browser or user agent that the contents are a long quotation. Indicates blocks of content from another source.

The blockquote tag is a semantic tag that tells the browser or user agent that the contents are a long quotation.  
.blockquote-reverse Indicates a blockquote with right-aligned content.

`<blockquote>` The blockquote tag is a semantic tag that tells the browser or user agent that the contents are a long quotation.

Indicates blocks of content from another source. `</blockquote>`

`<blockquote class="blockquote-reverse">`

The blockquote tag is a semantic tag that tells the browser or user agent that the contents are a long quotation. `.blockquote-reverse` Indicates a blockquote with right-aligned content. `</blockquote>`

# Bootstrap Table

# <table> Classes

Class	Description
.table	Adds basic styling (light padding and only horizontal dividers) to any <table>
.table-striped	Adds zebra-striping to any table row within <tbody>
.table-bordered	Adds border on all sides of the table and cells
.table-hover	Enables a hover state on table rows within a <tbody>
.table-condensed	Makes table more compact by cutting cell padding in half

# <tr>, <th> and <td> Classes

Class	Description
.active	Applies the hover color (light-grey) to a particular row or cell
.success	Indicates a successful or positive action
.info	Indicates a neutral informative change or action
.warning	Indicates a warning that might need attention
.danger	Indicates a dangerous or potentially negative action

# Responsive Table

Class	Description
.table-responsive	creates a responsive table. The table will then scroll horizontally on small devices (under 768px)

```
<div class="table-responsive">  
  <table class="table">  
    ...  
  </table>  
</div>
```

# Table Class Code

# Box Design

- .jumbostron
- .page-holder
- .well / .well-sm / .well-lg

# Classes

Class	Description
.page-header	Adds a horizontal line under the heading (+ adds some extra space around the element)
.jumbotron	Creates a padded grey box with rounded corners that enlarges the font sizes of the text inside it. Creates a big box for calling extra attention to some special content or information
.well	Adds a rounded border around an element with a gray background color and some padding
.well-lg	Large well (more padding)
.well-sm	Small well (less padding)

# .page-holder / .jumbotron

```
<div class="page-header"> <h3>Page Header</h3> </div>
```

Page Header

```
<div class="jumbotron">

# Bootstrap Button

# Button Classes

The classes below can be used to style any `<a>`, `<button>`, or `<input>` element

Class	Description
<code>.btn</code>	Adds basic styling to any button
<code>.btn-default</code>	Indicates a default/standard button
<code>.btn-primary</code>	Provides extra visual weight and identifies the primary action in a set of buttons
<code>.btn-success</code>	Indicates a successful or positive action
<code>.btn-info</code>	Contextual button for informational alert messages
<code>.btn-warning</code>	Indicates caution should be taken with this action
<code>.btn-danger</code>	Indicates a dangerous or potentially negative action
<code>.btn-link</code>	Makes a button look like a link (will still have button behavior)

# Button Classes

Class	Description
.btn-lg	Makes a large button
.btn-sm	Makes a small button
.btn-xs	Makes an extra small button
.btn-block	Makes a block-level button (spans the full width of the parent element)
.active	Makes the button appear pressed
.disabled	Makes the button disabled
.navbar-btn	Vertically aligns a button inside a navbar

# Button Group Classes

The classes below can be used to style any <a>, <button>, or <input> element

Class	Description
.btn-group	Groups buttons together on a single line
.btn-group-justified	Makes a group of buttons span the entire width of the screen
.btn-group-lg	Large button group (makes all buttons in a button group larger - increased font-size and padding)
.btn-group-sm	Small button group (makes all buttons in a button group smaller)
.btn-group-xs	Extra small button group (makes all buttons in a button group extra small)
.btn-group-vertical	Makes a button group appear vertically stacked
.btn-group	Groups buttons together on a single line
.btn-group-justified	Makes a group of buttons span the entire width of the screen

# Dropdown Classes

Class	Description
<code>.dropdown</code>	Indicates a dropdown menu
<code>.dropdown-menu</code>	Builds the dropdown menu
<code>.dropdown-menu-right</code>	Right-aligns a dropdown menu
<code>.dropdown-header</code>	Adds a header inside the dropdown menu
<code>.dropup</code>	Indicates a dropup menu
<code>.disabled</code>	Disables an item in the dropdown menu
<code>.divider</code>	Separates items inside the dropdown menu with a horizontal line

# Button Methods

Class	Description
<code>.dropdown</code>	Indicates a dropdown menu
<code>.dropdown-menu</code>	Builds the dropdown menu
<code>.dropdown-menu-right</code>	Right-aligns a dropdown menu
<code>.dropdown-header</code>	Adds a header inside the dropdown menu
<code>.dropup</code>	Indicates a dropup menu
<code>.disabled</code>	Disables an item in the dropdown menu
<code>.divider</code>	Separates items inside the dropdown menu with a horizontal line

# Button Group Classes Code

## Nesting Button Groups & Dropdown Menus

```
<div class="btn-group">
  <button type="button" class="btn btn-primary">Apple</button>
  <button type="button" class="btn btn-primary">Samsung</button>
  <div class="btn-group">
    <button type="button" class="btn btn-primary dropdown-toggle" data-
toggle="dropdown">
      Sony <span class="caret"></span></button>
    <ul class="dropdown-menu" role="menu">
      <li><a href="#">Tablet</a></li>
      <li><a href="#">Smartphone</a></li>
    </ul>
  </div>
</div>
```

# Button Group Classes Code

## Split Button Dropdowns

```
<div class="btn-group">
  <button type="button" class="btn btn-primary">Sony</button>
  <button type="button" class="btn btn-primary dropdown-toggle" data-
toggle="dropdown">
    <span class="caret"></span>
  </button>
  <ul class="dropdown-menu" role="menu">
    <li><a href="#">Tablet</a></li>
    <li><a href="#">Smartphone</a></li>
  </ul>
</div>
```

# Bootstrap Glyphicons

# Glyphicon Syntax

Bootstrap includes 260 glyphs from the Glyphicon Halflings set. Glyphicons Halflings are normally not available for free, but their creator has made them available for Bootstrap free of cost. As a thank you, you should include a link back to [Glyphicons](#) whenever possible.

Use glyphs in text, buttons, toolbars, navigation, or forms:

```
<span class="glyphicon glyphicon-name"></span>
```

## Glyphicons

Search icon: 

Search icon on a button:  Search

```
<p>Search icon: <span class="glyphicon glyphicon-search"></span></p>
```

```
<p>Search icon on a button:
```

```
<button type="button" class="btn btn-default">
```

```
<span class="glyphicon glyphicon-search"></span> Search
```

```
</button>
```

```
</p>
```

# Bootstrap Badges & Label

# Bootstrap Badges & Label Class

<code>.badge</code>	Creates a circular badge (grey circle - often used as a numerical indicator)
<code>.label</code>	Adds a grey rounded box to an element. Provides additional information about something
<code>.label-danger</code>	Red label
<code>.label-info</code>	Light-blue label
<code>.label-success</code>	Green label
<code>.label-warning</code>	Yellow label

# Bootstrap Badges Code

- News 5
- Comments 10
- Updates 2

Badges are numerical indicators of how many items are associated with a link:

```
<ul>
```

```
  <li><a href="#">News <span class="badge">5</span></a></li>
```

```
  <li><a href="#">Comments <span class="badge">10</span></a></li>
```

```
  <li><a href="#">Updates <span class="badge">2</span></a></li>
```

```
</ul>
```

```
<button type="button" class="btn btn-primary">Primary
```

```
<span class="badge">7</span></button>
```

```
<button type="button" class="btn btn-info">Info
```

```
<span class="badge">17</span></button>
```

# Bootstrap Label Code

Labels are used to provide additional information about something. Use the `.label` class, followed by one of the six contextual classes `.label-default`, `.label-primary`, `.label-success`, `.label-info`, `.label-warning` or `.label-danger`, within a `<span>` element to create a label:

Example New

Example New

Example New

Example New

Example New

Example New

Default Label

Primary Label

Success Label

Info Label

Warning Label

Danger Label

# Bootstrap Label Code

```
<h1>Example <span class="label label-default">New</span></h1>  
<h2>Example <span class="label label-default">New</span></h2>  
<h3>Example <span class="label label-default">New</span></h3>  
<h4>Example <span class="label label-default">New</span></h4>  
<h5>Example <span class="label label-default">New</span></h5>  
<h6>Example <span class="label label-default">New</span></h6>
```

```
<span class="label label-default">Default Label</span>  
<span class="label label-primary">Primary Label</span>  
<span class="label label-success">Success Label</span>  
<span class="label label-info">Info Label</span>  
<span class="label label-warning">Warning Label</span>  
<span class="label label-danger">Danger Label</span>
```

# Bootstrap Pagination

If you have a web site with lots of pages, you may wish to add some sort of pagination to each page.

# Bootstrap Pagination Class

<code>.pagination</code>	Creates a pagination (Useful when you have a web site with lots of pages. Used on <ul> elements)
<code>.pagination-lg</code>	Large pagination (each pagination link gets a font-size of 18px. Default is 14px)
<code>.pagination-sm</code>	Small pagination (each pagination link gets a font-size of 12px. Default is 14px)
<code>.breadcrumb</code>	A pagination. Indicates the current page's location within a navigational hierarchy

# Bootstrap Pagination Code

Active / Disable State

A disabled link cannot be clicked:

```
<ul class="pagination">
  <li><a href="#">1</a></li>
  <li class="active"><a href="#">2</a></li>
  <li><a href="#">3</a></li>
  <li><a href="#">4</a></li>
  <li class="disabled"><a href="#">5</a></li>
</ul>
```

# Bootstrap Pagination Code

Pagination Sizing .pagination-lg

Pagination Sizing .pagination-sm

```
<h2>Pagination Sizing .pagination-lg </h2>
```

```
<ul class="pagination pagination-lg">
```

```
<li><a href="#">1</a></li>
```

```
<li><a href="#">2</a></li>
```

```
<li><a href="#">3</a></li>
```

```
<li><a href="#">4</a></li>
```

```
<li><a href="#">5</a></li>
```

```
</ul>
```

```
<h2>Pagination Sizing .pagination-sm </h2>
```

```
<ul class="pagination pagination-sm">
```

```
<li><a href="#">1</a></li>
```

```
<li><a href="#">2</a></li>
```

```
<li><a href="#">3</a></li>
```

```
<li><a href="#">4</a></li>
```

```
<li><a href="#">5</a></li>
```

```
</ul>
```

# Bootstrap Pagination Code

## Breadcrumbs

[Home](#) / [Private](#) / [Pictures](#) / [Vacation](#)

```
<ul class="breadcrumb">
  <li><a href="#">Home</a></li>
  <li><a href="#">Private</a></li>
  <li><a href="#">Pictures</a></li>
  <li class="active">Vacation</li>
</ul>
```

# Bootstrap Pager

Pager is also a form of pagination (as described in the previous chapter).

Pager provides previous and next buttons (links).

To create previous/next buttons, add the .pager class to an `<ul>` element

# Bootstrap Pager Class

<code>.pager</code>	Creates previous/next buttons (used on <ul>elements)
<code>.previous</code>	Used to align pager buttons to the left side of the page (previous button)
<code>.next</code>	Used to align pager buttons to the right side of the page (next button)

# Bootstrap Pager Code

## Pager Basic Buttons

create previous/next buttons, add the .pager class to an ul element:

Previous

Next

## Align Buttons

Use the .previous and .next classes to align each button to the sides of the page

Previous

Next

```
<ul class="pager">
  <li><a href="#">Previous</a></li>
  <li><a href="#">Next</a></li>
</ul>
```

```
<ul class="pager">
  <li class="previous"><a href="#">Previous</a></li>
  <li class="next"><a href="#">Next</a></li>
</ul>
```

# Bootstrap List Groups

# Bootstrap List Group Class

<code>.list-group</code>	Creates a bordered list group for <code>&lt;li&gt;</code> elements
<code>.list-group-item</code>	Added to each <code>&lt;li&gt;</code> element in the list group
<code>.list-group-item-heading</code>	Creates a list group heading (used on other elements besides <code>&lt;li&gt;</code> )
<code>.list-group-item-text</code>	Used for item text inside the list group (used on other elements besides <code>&lt;li&gt;</code> )
<code>.list-group-item-danger</code>	Red background color for a list item in a list group
<code>.list-group-item-info</code>	Light-blue background color for a list item in a list group
<code>.list-group-item-success</code>	Green background color for a list item in a list group
<code>.list-group-item-warning</code>	Yellow background color for a list item in a list group

# Bootstrap List Group Code

## Basic List Groups

First item
Second item
Third item

## List Group With Badges

New	12
Deleted	5
Warnings	3

# Bootstrap List Group Code

<h2>Basic List Groups</h2>

```
<ul class="list-group">
```

```
  <li class="list-group-item">First item</li>
```

```
  <li class="list-group-item">Second item</li>
```

```
  <li class="list-group-item">Third item</li>
```

```
</ul>
```

<h2>List Group With Badges</h2>

```
<ul class="list-group">
```

```
  <li class="list-group-item">New <span class="badge">12</span></li>
```

```
  <li class="list-group-item">Deleted <span class="badge">5</span></li>
```

```
  <li class="list-group-item">Warnings <span  
class="badge">3</span></li>
```

```
</ul>
```

  <a href="#" class="list-group-item active">
    <h4 class="list-group-item-heading">First List Group Item Heading</h4>
    <p class="list-group-item-text">List Group Item Text</p>
  </a>
  <a href="#" class="list-group-item">
    <h4 class="list-group-item-heading">Second List Group Item
Heading</h4>
    <p class="list-group-item-text">List Group Item Text</p>
  </a>
  <a href="#" class="list-group-item">
    <h4 class="list-group-item-heading">Third List Group Item
Heading</h4>
    <p class="list-group-item-text">List Group Item Text</p>
  </a>
</div>
```

# Bootstrap Panels

A panel in bootstrap is a bordered box with some padding around its content:

# Bootstrap Panels Class

<code>.panel</code>	Creates a bordered box with some padding around its content
<code>.panel-body</code>	Container for content inside the panel
<code>.panel-danger</code>	Red panel. Indicates danger
<code>.panel-info</code>	Light-blue panel. Indicates information
<code>.panel-success</code>	Green panel. Indicates success
<code>.panel-warning</code>	Yellow panel. Indicates warning
<code>.panel-footer</code>	Creates a panel footer (light background color)
<code>.panel-group</code>	Used to group many panels together. This removes the bottom margin below each panel
<code>.panel-heading</code>	Creates a panel header (light background color)
<code>.panel-title</code>	Used inside a <code>.panel-heading</code> to adjust the styling of the text (removes margins and adds a font-size of 16px)

# Bootstrap Collapse

Collapsibles are useful when you want to hide and show large amount of content

# Bootstrap Collapse Class & Method

<code>.collapse</code>	Indicates collapsible content - which can be hidden or shown on demand
<code>.collapse in</code>	Show the collapsible content by default
<code>.collapsing</code>	Added when the transition starts, and removed when it finishes
<code>.panel-collapse</code>	Collapsible panel (toggle between hiding and showing panel(s))

Method	Description
<code>.collapse(options)</code>	Activates the collapsible element with an option. See options above for valid values
<code>.collapse("toggle")</code>	Toggles the collapsible element
<code>.collapse("show")</code>	Shows the collapsible element
<code>.collapse("hide")</code>	Hides the collapsible element

# Bootstrap Collapse Code

# Bootstrap Tabs / Pills

# Bootstrap Tabs/Pills Classes

<code>.nav nav-tabs</code>	Indicates a tabbed menu
<code>.nav nav-pills</code>	Indicates a pill menu
<code>.nav-justified</code>	Centers tabs/pills. Note that on screens smaller than 768px the items are stacked (content will remain centered)
<code>.nav-stacked</code>	Vertically stack tabs or pills
<code>.nav-tabs</code>	Creates a tabbed menu
<code>.tab-content</code>	Used together with <code>.tab-pane</code> to creates toggleable/dynamic tabs/pills
<code>.tab-pane</code>	Together with <code>.tab-content</code> and <code>data-toggle="tab"</code> , it makes the tab toggleable

# Bootstrap Navigation Bar

# Bootstrap Navigation Bar Classes

<code>.navbar</code>	Creates a navigation bar
<code>.navbar-brand</code>	Added to a link or a header element inside the navbar to represent a logo or a header
<code>.navbar-btn</code>	Vertically aligns a button inside a navbar
<code>.navbar-collapse</code>	Collapses the navbar (hidden and replaced with a menu/hamburger icon on mobile phones and small tablets)
<code>.navbar-default</code>	Creates a default navigation bar (light-grey background color)
<code>.navbar-fixed-bottom</code>	Makes the navbar stay at the bottom of the screen (sticky/fixed)
<code>.navbar-fixed-top</code>	Makes the navbar stay at the top of the screen (sticky/fixed)
<code>.navbar-form</code>	Added to form elements inside the navbar to vertically center them (proper padding)

# Bootstrap Navigation Bar Classes

<code>.navbar-header</code>	Added to a container element that contains the link/element that represent a logo or a header
<code>.navbar-inverse</code>	Creates a black navigation bar (instead of light-grey)
<code>.navbar-left</code>	Aligns nav links, forms, buttons, or text, in the navbar to the left
<code>.navbar-link</code>	Styles an element to look like a link inside the navbar (anchors get proper padding and an underline on hover, while other elements like p or span gets a default hover effect - white color in an inversed navbar and a black color in a default navbar)
<code>.navbar-nav</code>	Used on a <code>&lt;ul&gt;</code> container that contains the list items with links inside a navigation bar

# Bootstrap Navigation Bar Classes

<code>.navbar-right</code>	Aligns nav links, forms, buttons, or text in the navbar to the right.
<code>.navbar-static-top</code>	Removes left, top and right borders (rounded corners) from the navbar (default navbar has a gray border and a 4px border-radius by default)
<code>.navbar-text</code>	Vertical align any elements inside the navbar that are not links (ensures proper padding)
<code>.navbar-toggle</code>	Styles the button that should open the navbar on small screens. Often used together with three <code>.icon-bar</code> classes to indicate a toggleable menu icon (hamburger/bars)

# Bootstrap Navigation Bar Code

## Navigation Bars

```
<nav class="navbar navbar-default">
  <div class="container-fluid">
    <div class="navbar-header">
      <a class="navbar-brand" href="#">WebSiteName</a>
    </div>
    <ul class="nav navbar-nav">
      <li class="active"><a href="#">Home</a></li>
      <li><a href="#">Page 1</a></li>
      <li><a href="#">Page 2</a></li>
      <li><a href="#">Page 3</a></li>
    </ul>
  </div>
</nav>
```

# Bootstrap Navigation Bar Code

## Collapsing The Navigation Bar

# Bootstrap Navigation Bar Code

```
<nav class="navbar navbar-inverse">
  <div class="container-fluid">

    <div class="navbar-header">
      <button type="button" class="navbar-toggle" data-toggle="collapse"
data-target="#myNavbar">
        <span class="icon-bar"></span>
        <span class="icon-bar"></span>
        <span class="icon-bar"></span>
      </button>
      <a class="navbar-brand" href="#">WebSiteName</a>
    </div>
```

# Bootstrap Navigation Bar Code

```
<div class="collapse navbar-collapse" id="myNavbar">
  <ul class="nav navbar-nav">
    <li class="active"><a href="#">Home</a></li>
    <li><a href="#">Page 1</a></li>
    <li><a href="#">Page 2</a></li>
    <li><a href="#">Page 3</a></li>
  </ul>
  <ul class="nav navbar-nav navbar-right">
    <li><a href="#"><span class="glyphicon glyphicon-user"></span> Sign
Up</a></li>
    <li><a href="#"><span class="glyphicon glyphicon-log-in"></span>
Login</a></li>
  </ul>
</div>
</div>
</nav>
```

# Bootstrap Carousel

# Bootstrap Carousel Classes

<code>.carousel</code>	Creates a carousel
<code>.slide</code>	Adds a CSS transition and animation effect when sliding from one item to the next. Remove this class if you do not want this effect
<code>.carousel-indicators</code>	Adds indicators for the carousel. These are the little dots at the bottom of each slide (which indicates how many slides there are in the carousel, and which slide the user are currently viewing)
<code>.carousel-inner</code>	Adds slides to the carousel
<code>.icon-next</code>	Unicode icon (arrow pointing right), used in carousels. This is often used instead of a glyphicon
<code>.icon-prev</code>	Unicode icon (arrow pointing left), used in carousels. This is often used instead of a glyphicon
<code>.item</code>	Specifies the content of each slide

# Bootstrap Carousel Classes

<code>.left carousel-control</code>	Adds a left button to the carousel, which allows the user to go back between the slides
<code>.right carousel-control</code>	Adds a right button to the carousel, which allows the user to go forward between the slides
<code>.carousel-caption</code>	Specifies a caption for the carousel

# Bootstrap Carousel Code

## Bootstrap Carousel

---

# Bootstrap Carousel Code

```
<div id="myCarousel" class="carousel slide" data-ride="carousel">
```

```
<!-- Indicators -->
```

```
<ol class="carousel-indicators">
```

```
<li data-target="#myCarousel" data-slide-to="0" class="active"></li>
```

```
<li data-target="#myCarousel" data-slide-to="1"></li>
```

```
<li data-target="#myCarousel" data-slide-to="2"></li>
```

```
</ol>
```

# Bootstrap Carousel Code

```
<!-- Wrapper for slides -->  
<div class="carousel-inner">  
  <div class="item active">  
      
    <div class="carousel-caption">  
      <h3>SubTilte1</h3>  
      <p>The atmosphere in Chania has a touch of Florence  
and Venice.</p>  
    </div>  
  </div>
```

# Bootstrap Carousel Code

```
<div class="item">
```

```
  
```

```
  <div class="carousel-caption">
```

```
    <h3>SubTilte1</h3>
```

```
    <p>The atmosphere in Chania has a touch of Florence  
and Venice.</p>
```

```
  </div>
```

```
</div>
```

```
<div class="item">
```

```
  
```

```
  <div class="carousel-caption">
```

```
    <h3>SubTilte3</h3>
```

```
    <p>The atmosphere in Chania has a touch of Florence  
and Venice.</p>
```

```
  </div>
```

```
</div>
```

```
</div>
```

# Bootstrap Carousel Code

```
<!-- Left and right controls -->  
<a class="left carousel-control" href="#myCarousel" data-  
slide="prev">  
  <span class="glyphicon glyphicon-chevron-left"></span>  
  <span class="sr-only">Previous</span>  
</a>  
<a class="right carousel-control" href="#myCarousel" data-  
slide="next">  
  <span class="glyphicon glyphicon-chevron-right"></span>  
  <span class="sr-only">Next</span>  
</a>  
</div>
```

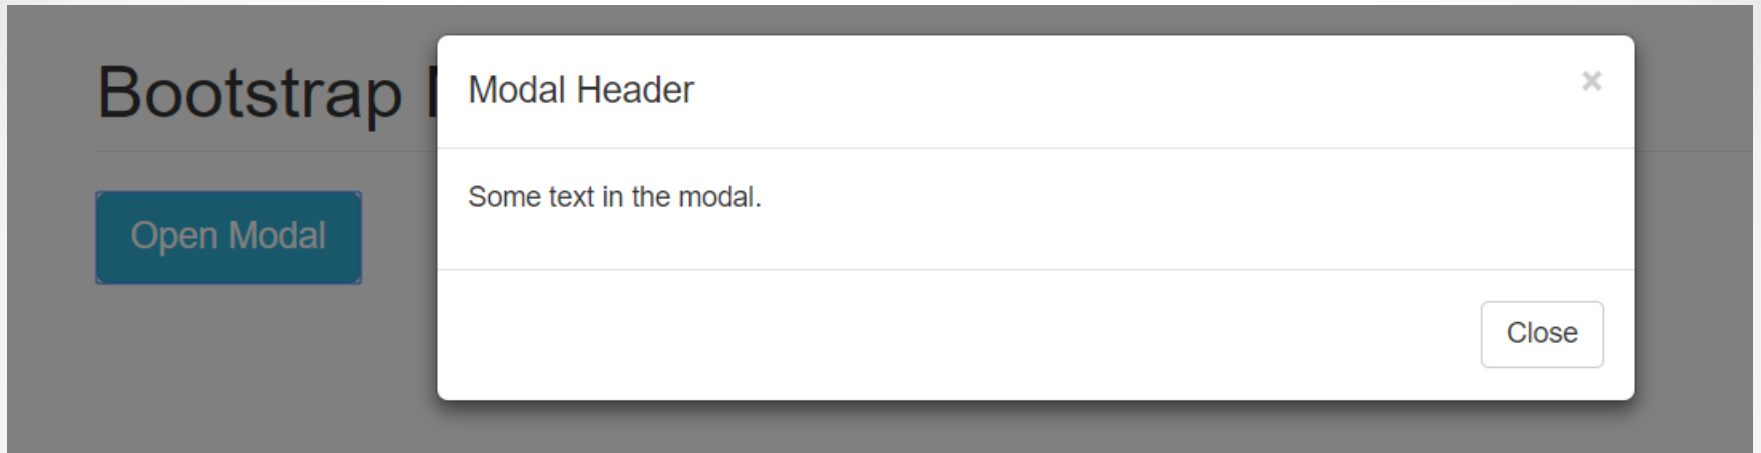

# Bootstrap Modal

# Bootstrap Modal Classes

Class	Description
.modal	Creates a modal
.modal-content	Styles the modal properly with border, background-color, etc. Use this class to add the modal's header, body, and footer.
.modal-header	Defines the style for the header of the modal
.modal-body	Defines the style for the body of the modal
.modal-footer	Defines the style for the footer in the modal. Note: This area is right-aligned by default. To change this, overwrite CSS with text-align:left center
.modal-sm	Specifies a small modal
.modal-lg	Specifies a large modal
.fade	Adds an animation/transition effect which fades the modal in and out

# Bootstrap Modal Code

# Bootstrap Modal Code

<!-- Trigger the modal with a button -->

<button type="button" class="btn btn-info btn-lg" data-toggle="modal" data-target="#myModal">Open Modal</button>

<!-- Modal -->
